DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schloss ("Schloss", USP 5911043) and Jancke et al ("Jancke", USP 5764913).

Regarding claims 1, 7, 12, 18, 23, 29, 34, and 40 Schloss teaches a method for validating content (abstract) comprising the steps of displaying said content and displaying an indication of a state of the validation of said content (blocks 1982' and 1984' in Fig. 4C). Schloss does not explicitly teach that said state of content corresponds to not reviewed, use with caution; or reviewed with a positive validation; or reviewed with a negative validation. However, the feature of indicating the operational state is known in the art of computer network as taught by Jancke. Specifically, Jancke teaches a computer network monitoring system which comprises the use of green, yellow, and red lights to indicate the operational state of the system (Fig. 4, col 3, lines 17-36). It would have been obvious to one of ordinary skill in the art, having the teaching of Schloss and Jancke before him at the time the invention was made, to modify the interface method taught by Schloss to include the light system taught by Jancke with the motivation being to enable the system to accurately reflect the status of the content.

Regarding claims 2, 4-5, 13, 15-16, 24, 26-27, 35, and 37-38, Schloss teaches the receiving user submitted comments, validation, or validation of comment to said content, said submissions affecting said indicated state of validation of said content (Fig. 4C).

Regarding claims 3, 6, 14, 17, 25, 28, 36 and 39, Schloss teaches the corrections to said content and said correction of content affecting said validation of said content (col 6, lines 34-41).

Regarding claims 8, 19, 30, 41, Schloss teaches fields for displaying categories and sub-topics related to said content (Fig. 4C).

Regarding claims 9-10, 20-21, 31-32, and 42-43, Schloss teaches that the content is new content (col 6, lines 24-25) or an addition to previously submitted content (col 6, lines 34-36).

Regarding claims 11, 22, 33, and 44, Jancke teaches the content is pertaining to technical information (col 3, lines 17-36).

3. The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R. § 1.111(c) to consider these references fully when responding to this action. The documents cited therein teach about rating content of web pages which relates to the claimed invention.
